

Location	<b>Graz, Austria</b>
Client	FLOWTEC Industrietechnik GmbH
Date	2006
Services	Detailed structural design and construction of formwork and reinforcement drawings.

Description

The architecture of this combined storage and office building is governed by its simplicity and functionality. The structure has no columns in the storage areas ensuring optimal usage of this area. The structural design was performed according to Austrian norm OeNorm B4700 and the dimensions of all load-carrying components were optimised using Finite Elements methods.
