

Habicht n° 4 Skywalk Waltrafelsen

Location	St. Anna ob Aigen Oststeiermark, Austria
Client	Gemeinde St. Anna ob Aigen
Date	2006
Services	Structural design, Construction engineering

Description

The structural system of the viewing platform "Habicht n° 4" displays great similarities to a small cable stayed bridge. However, rather than connecting two shores, the visitors are invited to walk out over the abyss. The steel platform has a width of 2m and cantilevers out by 15m over a crag.
